

SARTHAK AGGARWAL

sa7826@srmist.edu.in | 9354558399 | 2027
B.Tech, Computer Science and Engineering - Artificial Intelligence and Machine Learning
Address : 34-first floor, Neelam Vihar Society
Kaushambi sec-14, behind Raddison Blu Hotel
Ghaziabad, 201010

Summary

Computer Science student with strong skills in Python, Machine Learning, Data Science, SQL, and Problem Solving. Experienced in data analysis, machine learning model development, and implementing programming solutions using efficient algorithms and data structures. Proficient in Python libraries for data processing and analysis, with knowledge of database management and software development practices. Passionate about exploring Artificial Intelligence, building innovative projects, and developing interactive applications with an interest in Game Development. Strong analytical thinker with the ability to learn new technologies and solve complex technical problems.

Education

SRM IST-Ghaziabad	2027
B.Tech · Computer Science and Engineering - Artificial Intelligence and Machine Learning	CGPA - 8.87/10
Vivekanand School	2023
Class XII - CBSE · mpc · Anand Vihar rd, Block D, Anand Vihar, Delhi, 110092	Percentage - 75.6%
Vivekanand School	2021
Class X - CBSE · mpc · Anand Vihar rd, Block D, Anand Vihar, Delhi, 110092	Percentage - 74.83%

Experience

IBM SkillsBuild	Jun 2025 - Jul 2025
Artificial Intelligence · AI Intern · Virtual Internship	Work from Home
Completed a virtual internship under IBM SkillsBuild in collaboration with AICTE focused on Artificial Intelligence, Machine Learning, and emerging technologies. Gained practical exposure to AI concepts, problem-solving, and industry-oriented learning while enhancing technical and analytical skills through online modules and hands-on activities.	
BharatCares	Jun 2026 - Present
Gen AI and Cloud Computing · Intern · Part-time	Kaushambi, GZB
Currently pursuing an internship focused on Generative AI and Cloud Computing, gaining practical knowledge of AI technologies, cloud platforms, and modern AI-driven solutions. Developing skills in Python, prompt engineering, AI models, cloud-based applications, and implementing emerging technologies for real-world use cases.	

Projects

2048 Game	Oct 2024 - Nov 2024
Individual · Python, arrays	DSA
Developed a Python-based 2048 puzzle game implementing tile movement, merging logic, score tracking, and game mechanics using problem-solving and programming concepts.	
Movie Recommendation System Live Demo	Feb 2026 - Mar 2026
SRM Institute of Science and Technology · Tools & Technologies: Python, Pandas, NumPy, Scikit-learn, NLTK, Streamlit, TMDB API, Google Drive API, Jupyter Notebook, Git, GitHub, VS Code	Machine Learning
Built a content-based movie recommender using Python, Scikit-learn, and NLTK. Processed TMDB 5000 dataset, applied CountVectorizer and Cosine Similarity to recommend similar movies. Integrated TMDB API for live movie posters and deployed on Streamlit Cloud.	
AI-NLP Chatbot	Jul 2026 - Present
Individual · Python and NLTK	AI, NLP
Developing an AI-based NLP chatbot using Python, implementing natural language processing techniques, intent recognition, and automated responses to improve user interaction and conversational experience.	

Certifications

GenAI
Simplilearn · 8606538

Jul 2025

Completed a Generative AI course from Simplilearn focused on the fundamentals of AI-generated content, large language models, and modern AI applications. Gained knowledge of Generative AI concepts, prompt engineering, AI tools, and practical applications of machine learning in content generation and intelligent systems.

AI for beginners
HP · 899fe4e6b-065c

Jan 2026

Completed the AI for Beginners course by HP Life focused on the fundamentals of Artificial Intelligence, machine learning concepts, and real-world AI applications. Gained understanding of intelligent systems, problem-solving techniques, and the growing impact of AI across various industries and technologies.

Intro to Data Science
Infosys

Apr 2026

Completed a Data Science course from Infosys focused on data analysis, machine learning fundamentals, and data-driven problem solving. Gained knowledge of data handling, visualization, statistical concepts, and practical applications of data science using modern tools and technologies.

NPTEL Certification
NPTEL

May 2026

Successfully completed the NPTEL Natural Language Processing (NLP) examination focused on understanding language processing techniques, text analysis, and AI-based language models. Gained knowledge of NLP concepts including text preprocessing, machine learning applications in language understanding, and computational linguistics fundamentals.

Publications

Human Emotion Detection

Apr 2026

5th International Conference on Sustainable Computational technologies

Developed a Human Emotion Detection project based on Artificial Intelligence and Computer Vision that identifies human emotions through facial expressions using machine learning techniques. The project focuses on real-time emotion analysis to improve human-computer interaction and intelligent systems. The research work was published in the 5th International Conference on Sustainable Computational Technologies, highlighting its innovation and practical significance in AI applications.

Skills

Programming Languages: Python, C/C++
Domain Knowledge: Machine Learning, AI
Areas of Interest: Game Development

Languages

English [Native Proficiency], Hindi [Native Proficiency], German [Fundamental Proficiency]
